NATURAL BEAUTY
 COFFEE TABLE WITH A DETACHABLE TRAY
 SOLID WOOD WITH PLYWOOD, POLISHED TO PERFECTION

Console - Harmony

Harmony is inspired by the classic, victorian, renaissance era and the development of this type in Karachi, Pakistan.

The top semi circle is in perfect harmony with the bottom two semi circles which represent balance and progression.

Shisham is the wood being used to form the design of Harmony and oak plywood is used for the top layer. This console would brighten the front entrance of any home, office and institutions looking to promote their organization. This console is in its most natural form without any polish or finishes.

Coffee Table

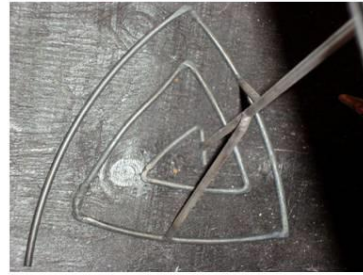

This coffee table is inspired by the city of Toronto. The form of the table represents movement and the pattern & colours on the surface represent sub-cultures, how the city changes from dawn till night time. The form of the table makes space to store everyday necessities while it is being used as a coffee table.

T Lights
The concept is driven from transparency and the buildings of a city. These are made of stainless steel and getting the dried wax off the T light holders would not be an issue. These give off enough light that another form of lamp or light source is not required in a room. Nothing's better than these T lights to light your dinner tables.

INTERIOR DESIGN
CONSULTATION
DECORATION

Sir Faisal Sajad
He is not happy with his Toyota and how everyone in the city is driving the same car.

There is a Type 3 Variant 1972 which he wants me to stylize its exterior body and its interior inspired by and should have a feel of Italian vintage cars. While retaining the engine, mechanic and suspension of the car, he wants a luxury sports car and a retro look with modern fittings. He likes the low profile, short and the lines of cars such as Alfa Romeo 33 Srdale 1967, Sports Cope, Spider and Maserati A6 1947.

Italian cars are often associated with high performance luxury sports cars. These cars are noted for excellent handling, exquisite styling and quick acceleration. Italian cars have classic, timeless design and styling that exhibits their racing and motor sport history shared by many major Italian manufacturers. Even the modern 'so called city cars like Fiat's Ecobasic, have fun, unique styling tempered with environmentally conscious materials'.

Tea Party

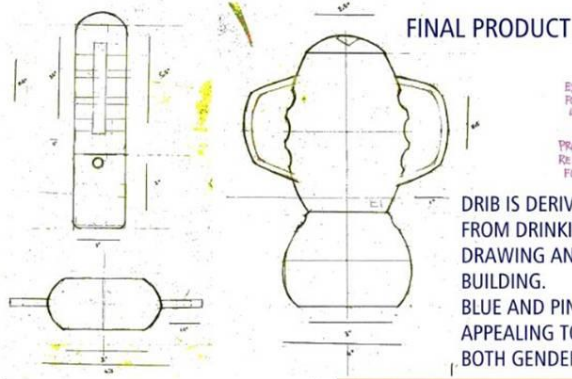

21st till 22nd Feb 2020
4:00 - 8:00 pm
